01

ISO 9000 is an international standard of quality management & quality assurance. It certifies that the company or the org. are functioning & documenting the quality system elements which are req. to execute a sys. efficiently with all the qualitative features.

This criteria focuses on the relation- -ship b/w the client & the manufacturer/supplier and reduces the risk from client's side.

This standard is more commonly used in manufacturing industry rather than software firms & is almost globally accepted having a time frame of 3 years.
